

source-selected 12-port carrier architecture

presentation-invariant, architecture-sensitive

federation of self-reading supports

records, feedback, checkpoints, accepted repair

one public normal form

schedule-independent only under the consensus receipts

geometry and gravity

source-derived finite 1+3 precursor

$\mathbb{R} \oplus$ rank-3 quotient $\rightarrow$ ambient dim 4, (+---)

source height enters only $F(e)=(\tau h, x)$; edge/converse $\rightarrow$ order $\leftrightarrow$ cone

9 balances $\rightarrow$ Einstein shape on a separate supplied tensor interface

physical #l/p, refinement, manifold, topology, curvature: conditional

$\rightarrow$ effective 3+1 / smooth GR, conditional

currents and matter

physical-current attachment required

A_5 port response $\rightarrow$ compact current

Standard Model Lie type

matter and QFT, conditional

one source-bound observer world

route identity, attachment, and inhabited-tower receipts are required
